

Season's
Greetings

From the Enid & Daphne Henry
Foundation Team

WHO WE ARE WE ARE

OUR MISSION

Provide reading, writing and chess enrichment programs, as well as financial grants for educational, mental and athletic needs. Serve as a resource for referral services.

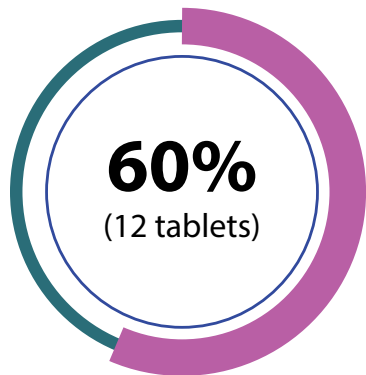

RECENT ACTIVITIES

LEARNING DEVICE

DONATION FUNDRAISING

Contributions from family and friends of EnDH have been used to purchase 12 tablets thus far. Together we are investing in our children's future, and transforming lives. Let's continue our efforts and giving to meet our goal of 20 tablets for students at Mineral Heights Primary School in Clarendon, Jamaica.

MEET THE YOUNG CONTRIBUTORS

OF THE FOUNDATION

MYLES HYACINTHE

EnDH Relationship: Great Grandson of Daphne Henry

Pet: Rabbit, Bunn Bunn

Favorite Food: Rasta Pasta

Favorite Subject: Mathematics

Fun Fact: Fierce Soccer Goalkeeper

Extra Curricular Activities: Chess, Playing the flute, Soccer, Lacrosse, Jui Jitsu

CLIMATE CHANGE CONVERSATIONS WITH YOUR KIDS

Weather, Climate And Today's Environment

The National Aeronautics and Space Administration (NASA) describes global warming as the long-term heating of Earth's climate system due to human activities. In 2021 globally, there were: seven times more scorching heatwaves, 2.6 times more droughts, 2.8 times as many river floods, almost 3 times as many crop failures, and 2 times the number of wildfires than in 1960," according to the Imperial College of London (Dunning).

The main cause of global warming is fossil fuel burning, which increases heat-trapping greenhouse gas levels in Earth's atmosphere. It is commonly measured as the average increase in Earth's global surface temperature which has moved at a record pace since the 1980s (NASA). The 10 warmest years on record have occurred since 2005 (Rebecca Lindsey).

What It Means for Today's Children

- Unpredictable and extreme weather conditions make it harder to grow crops and rear livestock to provide food.
- Longer droughts and heavier rains in seasonally arid and tropical regions may ultimately result in less food production to meet family's needs which will lead to famine (Met Office)
- Infrastructural Damage Due to Storms and Tornadoes. For many regions, large tropical cyclones or tornadoes also have the potential to devastate a region, causing loss of life and widespread destruction to educational, technological and transportation infrastructure. Recently powerful tornadoes barreled through five US states, leveling houses and factories and bringing down power lines. In Kentucky, the worst-hit state, one tornado alone followed an extraordinarily long and destructive path of more than 200 miles (Edward Helmore).

How Can We All Help?

- Use reusable water bottle and cups, drinking straws, shopping bags
- Switch to electricity generated by energy sources with low—or no—routine emissions of carbon dioxide such as solar and wind. (World Wildlife Fund)
- Track and reduce your carbon emissions by using an online "carbon calculator." like the one maintained by the U.S. Environmental Protection Agency (World Wildlife Fund)
- Commute by carpooling or using mass transit

Five Ways to Include Children

1. Include **real-world examples** to explain climate change concepts.
2. **Believe in their ability** to comprehend what is being discussed.
4. **Be optimistic**, and focus on positive steps for change.
3. View discussions as a **collaborative learning** experience.
5. **Instill confidence** that they can make a difference like *Greta Thunberg*.

FUTURE ACTIVITIES

BACK TO SCHOOL UNIFORM DONATIONS

We are optimistic about the upcoming school year and at least a partial return to the classroom. Once our tablet goal is achieved, additional funds raised will be used to purchase school uniforms for the students.

2022 will bring new challenges. Please help share the word about the Foundation as we grow our membership. Thanks again.
